### KEGIATAN 3 IGRP (Interior Gateway Routing Protocol)

3. Pada mode configuration, konfigurasi routing RIP pada router eagle.

4. Lihat konfigurasi routing EIGRP yang telah dibuat dengan perintah ***"Show runningconfig"*** pada mode user. Perhatikan konfigurasi pada bagian ***"router rip"***

5. Lihat proses transaksi routing EIGRP pada router eagle dengan perintah "debug EIGRP transactions" pada mode user. Tunggu beberapa saat untuk melihat informasi transaksi routing EIGRP yang terjadi.

```

6. Lihat proses transaksi routing EIGRP pada router eagle dengan perintah **"debug ip eigrp transactions"** pada mode user. Tunggu beberapa saat untuk melihat informasi transaksi routing EIGRP yang terjadi.

Catatan : Hasil tampilan perintah "debug ip eigrp transactions" memperlihatkan informasi update routing EIGRP secara detail. Untuk melihat informasi update routing EIGRP secara lebih ringkas digunakan perintah "debug ip eigrp events". (dengan lebih dahulu menonaktifkan "debug ip eigrp transactions" dengan perintah "no debug ip eigrp transactions").

7. Lakukan konfigurasi routing EIGRP pada router puma dan tiger. Perhatikan proses update routing EIGRP pada router eagle (secara detail) ketika konfigurasi router puma dan tiger dilakukan.

#### Router Puma :

- Konfigurasi routing EIGRP pada router puma :

```
changed state to up

Router>en
Router#conf term
Enter configuration commands, one per line. End with CNTL/Z.
Router(config)#router eigrp 100
Router(config-router)#network 172.21.0.0
Router(config-router)#
%DUAL-5-NBRCHANGE: IP-EIGRP 100: Neighbor 172.21.1.1 (Serial12/0)
is up: new adjacency
```

- Melihat konfigurasi routing EIGRP yang telah dibuat.

```
Router#show running-config

## Router Tiger :

- Konfigurasi routing EIGRP pada router tiger.

```
Router>en

8. Dari PC Leo lakukan trace ke PC aries

9. Buat hubungan antara router eagle dan puma terputus dan perhatikan proses update routing RIP yang terjadi.

Langkah pengoperasian:

- Masuk ke router puma
- Masuk mode interface s0
- Ketik shutdown

```

Router#no debug eigrp packets
EIGRP Packets debugging is off
Router#conf term
Enter configuration commands, one per line. End with CNTL/Z.
Router(config)#int se2/0
Router(config-if)#shutdown

Router(config-if)#
